HASAN TAHSEEN

Full Stack Developer

ht3aa2001@gmail.com | Baghdad
2 years of experience

PROFESSIONAL SUMMARY

I am a Full Stack Developer primarily working with the TALL stack (Tailwind CSS, Alpine.js, Laravel, and Livewire), using Filament for building admin dashboards. I contributed to the SIS project for the Ministry of Higher Education in Iraq and worked on the Gini Cars application for Gini Company, which is currently live within the SuperQi app.

WORK EXPERIENCE

Gini - QI Card

Full Stack Developer May 2025 — Present · 9 mos

My responsibility is to maintain and develop the gini cars app (which is now in live on super qi app) using TALL stack and filament

Ta3leem - EarthLink

10 mos

Full Stack Developer Sep 2024 — May 2025 · 8 mos

For almost nine months, I worked as a Full Stack Developer using Laravel, Filament, and Livewire, contributing to the SIS project for the Ministry of Higher Education in Iraq.

QA Engineer Jul 2024 — Sep 2024 · 2 mos

For almost three months, I worked as a QA manual tester, testing the applications produced by the company.

TECHNICAL SKILLS

PHP · JavaScript · Laravel · Livewire · ZainCash Payment Gateway · Leading · HTML

PROJECTS

Find Developer Platform

I am the founder of this platform, which aims to gather developers in one place and provide them with more opportunities to find jobs or freelance work.

Gini Cars (Mini App in Super Qi)

I was responsible for the backend of the Gini Cars application, which is now deployed as mini app within the Super QI application.

Student Information System (SIS for Ministry of Higher Education)

I was one of the Backend maintainers of the SIS project for the Ministry of Higher Education in Iraq, which is used across all universities in the country.
