 msydev | Mustafa Salem

Summary

I'm Mustafa Salem, a passionate and detail-oriented Front-End Developer based in Baghdad, Iraq. With over three years of hands-on programming experience, I specialize in creating modern, responsive, and user-focused web applications. I'm driven by innovation and continuously strive to deliver clean, efficient code and seamless user experiences.

Skills

- **Programming Languages & Markup**: HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Frameworks & Libraries**: Nextjs, Tailwindcss, Tanstack Query, React Hook Form, i18next, Apollo Graphql, Shadcn UI
- **State Management**: Redux Toolkit, Zustand, Recoil, Context Api
- **APIs & Data Handling**: Graphql, Axios
- **Version Control**: Git, GitHub
- **Languages**: Arabic(native), English (intermediate)

Experience

PROJECT ONE.

Front-end web developer | 2022 – 2023

I designed and developed responsive websites and dashboards, including portfolio sites like **ASN Group** and the **Orkida Dashboard Management System**. My work focused on clean UI, performance, and collaboration with design and back-end teams.

AZU.

Front-end web developer | December 2023 – March 2025

- Built and maintained **AI powered Hospital Management System** focusing on building user-friendly interfaces, responsive components, and integrating with complex backend systems
- Designed and developed the **Akkad Academy Dashboard** using **Apollo GraphQL**, featuring real-time data visualization, role-based access, interactive charts, YouTube/Vimeo authentication, and full management of teachers, students, and exams.
- Built the **AZU-Pay Coupons System**, enabling users to generate, redeem, and manage discount coupons, with role-based access and real-time validation integrated into the AZU payment workflow.
- Developed an AI-powered **Beauty Clinic Management System**, delivering smart appointment scheduling, client tracking, and responsive UI components tailored for an enhanced user experience.
- Built and launched several modern websites, including **Ard Al Suhaib Trading & General Contracting Co**, using **React.js**, **Next.js**, and **Tailwind CSS**, with a focus on performance and accessibility.

Other

- Built a **Personal React portfolio** using **React** and **Tailwind CSS**, showcasing web development skills and projects.
- Developed a **CPU Scheduling Algorithms Solver** using **Vanilla JS** and **SCSS**, demonstrating problem-solving and algorithmic implementation.

Education

BAGHDAD UNIVERSITY

BS in Computer Science Teaching Methods
Ranked 4th in the Computer Science Department and completed relevant coursework in web development, database management, and software engineering.
